For further information about extending your Canon service and support, call 18003852155, or visit our web site at www.canonesp.com. CarePAK must be purchased during your product's warranty period. Loading paper in the Sheet Feeder is easy, and is convenient if you frequently switch to and print on various sizes or types of paper. Loading paper in the Cassette allows you to print without reloading paper for each job. Flatten the four corners of the paper before loading it. You can load up to 150 sheets of plain paper 64 gsm or 17 lb, 13 mm or 0.52 inches in height in the Sheet Feeder. However, do not stack more than 50 sheets in the Paper Output Tray. You can load up to 150 sheets of plain paper 64 gsm or 17 lb, 13 mm or 0.52 inches in height in the Cassette. However, do not stack more than 50 sheets in the Paper Output Tray. You can also select the paper source with the printer driver. For details, refer to "Changing the Paper Source" in the Basic Printing 1 1 Push the upper center of the Front Cover to open the Paper Output Tray. For a detailed description of the printer driver settings, refer to Windows". The steps described in this section are for printing in Windows XP. Turn on the printer. "Turning on the Printer" Load the paper in the printer. The Print dialog box opens. Specify the required settings. 2 Ensure that your printer is selected. 3 Click Preferences or Properties. 1 Click Media Type to select the type of media loaded in the printer. Click Cancel Printing on BJ Status Monitor to stop printing. To show BJ Status Monitor, click Canon PIXMA iP8500 on the taskbar. BJ Status Monitor opens automatically when a printer error occurs. The steps described in this section are for printing in Mac OS X v.10.3.x. Turn on the printer. "Turning on the Printer". The Page Setup dialog box opens. Specify the required settings. 1 Select Print from the application software's File menu. The Print dialog box opens. Basic Printing 2 Select your printer from Format for.http://heritagecam.com/userfiles/ibm-t60-user-manual-pdf.xml

For a detailed description of the Paper Source settings, refer to "Changing the User's Guide Paper Source" in the When you select the print mode appropriate to your document from Print Mode, the document will be printed in color and at a print quality suited to the characteristics of the Media Type you have selected. To cancel a job in progress, select the desired document, then click Delete. To temporarily stop a job in progress, click Pause. If you do so, electric shock, fire, or damage to the camera could result. A PictBridgecompliant digital camera. A Canon Bubble Jet Direct compatible digital camera. Direct Printing from PictBridgecompatible Digital Cameras Default Camera Settings. To use Photo Paper Pro, select Fast Photo from Paper type. The following sizes and types of paper can be loaded in the printer by selecting options from Paper size and Paper type. This manual refers to Windows XP operation. The operations may vary depending on your operating system. Opening the Printer Properties Dialog Box from Your Application Program Depending on your application program, the command and menu names. See inside the back cover for a list of Canon Specialty Papers and ink tanks for this printer. On the Main tab, select Custom from Print Quality, then click Set to open the Set Print Quality dialog box. When the process is complete, click Print. To automatically optimize the image Photo Optimizer PRO automatically adjusts the photographs taken with a digital camera. Use this feature to compensate for unsatisfactory color balance and over or underexposure before printing. In Windows Me or Windows 98 If Background Printing has been disabled, the Vivid Photo function is not available. To reduce noise from images taken with a digital camera The Photo Noise Reduction function reduces noise from blue portions such as the sky, and

dark portions of the images taken with your digital camera.

In Windows Me or Windows 98 If Background Printing has been disabled, the Photo Noise Reduction function is not available. Open the printer properties dialog box. Open the Print dialog box. "Printing with Macintosh" Set all necessary items. Register new printer driver settings. The Save Preset dialog box opens. Click OK. This registers your printer driver settings. You can retrieve or change the saved driver settings at any time. In Macintosh, doubleclick the hard disk icon, the Applications folder, the Easy PhotoPrint folder, and then doubleclick the EasyPhotoPrint icon. For example, using this feature, you can correct the redeye caused by the camera's flash or smooth and beatify the facial skin. In Macintosh, click Print. When the confirmation message is displayed, click OK. And then, click Print in the Print dialog box. The printer will not print properly if the wrong ink tank is used, or installed in the incorrect position. With your printer, ink tanks must be installed in the order of left to right as indicated below. Green BCI6G Red BCI6R Photo Magenta BCI6PM. It is important to quickly identify the empty tank using the BJ Status Monitor Windows or error messages Macintosh and replace it. Printing will resume as soon as ink tank is replaced and the Inner Cover and the Top Cover are closed. Checking the ink level 1 Doubleclick the hard disk icon where the printer driver was installed, the Applications folder, and then the Utilities folder. Ensure that the printer is on, and then push the upper center Front Cover to open the Paper Output Tray. Open the Top Cover, and pull down the Inner Cover forward to open. The Print Head Holder moves to the center. Then, remove the film. 2 Remove the orange protective cap from the bottom of the ink tank and discard it. Insert the ink tank. Be sure to remove the clear film from the ink tank in the exact order shown in step 41, as failure to follow this step may cause the ink to leak and stain your clothes and hands.

The Print Head Holder moves to the right. The ink tank installation process is now complete. Ensure that the Inner Cover is closed. Printing will not occur if the Inner Cover is open. Follow the procedures below to clean the nozzles. If the ruled lines are shifted after running the print head maintenance, align the Print Head. Use this function when printed results are blurred or the color is incorrect. Printing the Nozzle Check Pattern Without a Computer. The nozzle check pattern will be printed. Clicking Initial Check Items displays the items to be checked before cleaning. 4 When the confirmation message is displayed, click OK. 5 Ensure that the pattern is printed properly. When using Mac OS X v.10.2, doubleclick the Print Center icon. 3 Select the name of your printer from the Name list and click Utility. Examine the nozzle check pattern output by the printer. The nozzle check pattern will not be printed correctly if there is not enough ink. Note that cleaning the Print Head causes waste ink to be absorbed in the waste ink absorber. Cleaning the Print Head consumes ink, so perform Print Head Cleaning only when necessary. Do not perform any other operations until the Print Head Cleaning finishes. This takes about 70 seconds. Clicking Initial Check Items displays the items to be checked before cleaning. When using Mac OS X v.10.2, doubleclick the Print Center icon. 3 Select the name of your printer from the Name list and click Utility. This takes about 70 seconds. Clicking Initial Check Items displays the items to be checked before cleaning. 5 Read the message and click Print Check Pattern to print the nozzle check pattern. The nozzle check pattern is printed. Note that cleaning the Print Head causes waste ink to be absorbed in the waste ink absorber. Print Head Deep Cleaning consumes more ink than standard Print Head Cleaning, so perform this procedure only when necessary. Print Head Deep Cleaning starts when the POWER lamp starts blinking.

Do not perform any other operation until the Print Head Deep Cleaning finishes. Open the BJ Printer Utility dialog box. 1 Doubleclick the hard disk icon where the printer driver was installed, the Applications folder, and then the Utilities folder. 2 Doubleclick the Printer Setup Utility icon. When using Mac OS X v.10.2, doubleclick the Print Center icon. This takes about 90 seconds. Clicking

Initial Check Items displays the items to be checked before cleaning. Print Head Deep Cleaning starts when the POWER lamp starts blinking. Print the nozzle check pattern to check the Print Head condition. Aligning the Print Head positions allows you to print without shifts in the color registration. Print head alignment is performed either automatically or manually. This section deals with automatic Print Head alignment only. If a message warning you not to perform other operations appears, click OK. Check the printed pattern. If the pattern is printed as shown below, and the Print Head is aligned automatically. The printer is now ready to use. Open the BJ Printer Utility dialog box. 1 Doubleclick the hard disk icon where the printer driver was installed, the Applications folder, and then the Utilities folder. 2 Doubleclick the Printer Setup Utility icon. If the pattern is still not printed successfully, refer to "Eleven flashes" "Handling Error Messages" If results of Automatic Print Head Alignment are not satisfactory, refer to "Aligning the Print Head". Reduce the Intensity setting in the printer driver and try printing again. Slide the paper guides against the paper stack, and check to see if the paper is not loaded beyond the Load Limit Mark. See "Loading Paper" on page 3 and "Canon Specialty Media" Try This on page 14. Be careful not to touch the components inside the printer. If you cannot extract the paper, turn the printer off, and then turn it back on. If the paper is loaded in the Sheet Feeder, remove the paper from the Sheet Feeder. 2.

The number of flashes indicates the type of error that has occurred. Count the flashes and take the appropriate action to correct the error. Number of Possible Cause Flashes Two flashes Printer is out of. A USB port is selected if either USBnnn Canon PIXMA iP8500 or MPUSBPRNnn Canon PIXMA iP8500 where n is a number is indicated. Camera Error Message Possible Cause Printer in use. This section describes errors that are indicated on Canonbrand PictBridge or Bubble Jet Directcompatible cameras. The error messages and operations may vary depending on the camera you are using. Please try your search again later.Its addition of red and green ink tanks expands the color spectrum to a level achieved only by professional printers, and the difference is vividly clear. EasyPhotoPrint v3.0 While most photoediting software applications will brighten the entire image, EasyPhotoPrint 3.0 accurately detects the subjects face and adjusts the skin to the optimum tone. Brighten dark faces caused by bright backgrounds. Choose from oneclick automatic to correct the entire image all at once, or manual to correct just a selected area. EasyPhotoPrint 3.

0 also lets you select and print any image on your PC, perfectly trim images, correct images using labquality retouching features, correct redeye, smooth facial lines and skin tone, sharpen faces, remove blemishes, and print in a variety of sizes and layouts. Plus, Canon Fullphotolithography Inkjet Nozzle Engineering FINE uses a highperformance print head with an amazing 6,144 nozzles, ejecting precise, consistent droplets as small as 2 picoliters. The result is richer images with improved brilliancy rivaling that of positive film. Your images will come to life as never before. This featurerich printer even lets you print without a computer simply connect any PictBridgecompatible digital camera or DV camcorder, and print. You can also produce edgetoedge true borderless photos in 4by6, 5by7, and 8.5by11inch sizes, with the look and feel of traditional photographs. How fast Thanks to those 6,144 nozzles, a 4by6 borderless print takes approximately 23 seconds. Plus, the printers USB HiSpeed interface enables fast data transfer from your computer, reducing total print time. Thanks to eight individual ink tanks, you can replace only the color that runs out, rather than an entire cartridge containing several colors of unused ink. Plus, a unique lowink sensor alerts you when ink levels are low, so can just drop in a new tank as needed. Bottom line more efficient printing with lower costs.

Dopter 5.0 out of 5 stars I did extensive research, read all the reviews, and settled on this model only after careful consideration. It all paid off when I installed this beautiful machine on my computer and printed off the first picture. I used the low speed USB connection, although it has been noted that a USB2 also exists. I was unsure if my computer would handle the USB2. Anyhow, I found the printing speed to be excellent even using the normal USB. The software installation proceeded smoothly, the setup of the printer was intuitive, and the output was extremely high quality, exceeding my expectations, on the very first try. I have been using the printer frequently since I first installed it. I normally use the Canon Photo Paper Pro, and have been consistently delighted by the results. I have not run out of any ink yet, but I must be getting close by now.

People who see the photos I have printed remark that they look like processed photographs. I should

point out that I use Photoshop to clean up every photo before I print it, and I try to go with a resolution of at least 600 dpi to achieve photoquality output. Any higher than that, and the storage size of each photo gets pretty huge. The color balance has been superb; no overweighting of any particular type of ink. One of my pet peeves of inkjet printers, and I have owned many, is that the nozzles tend to clog over time and the output starts to have horizontal lines in it. I have not noticed that at all with the Pixma. The ink pots do NOT have the print heads in them, as HP and many others do. Instead there is a separate, replaceable print head. I like this, because it keeps down the cost of each ink pot, and allows the user to easily replace the print head when it really needs it. The printer seems to have a cleaning cycle that is very frequent, which must account for the fact that I have never had to initiate a cleaning cycle manually and why I can walk over to my computer and print a photo without having to worry about whether or not I will be wasting highend photo paper on mediocre output. There are 8 separate ink pots. I like this because you only need to replace them as they run out, rather than replace a single, expensive, multicolor cartridge that costs an arm and a leg. This is also a very nice looking printer, unlike most I have seen. The design is sleek enough that you would not mind having it prominently visible in your office. It is fairly quiet in operation, and I have had no problems of paper misfeeds or jams whatsoever. One comment, which probably goes without saying, but if youre not a print expert you may not realize it You would not want to use this as your only printer. Keep your cheapie for normal text and the like, and reserve this for photographs only.
