Reload to refresh your session. The easiest way to interrupt a chosen cycle on most models is to hold the OnOff button for at least 10 seconds. This should stop complete operation. PanelsHold these two buttons down at the same time for about 3 seconds. This resets the dishwasher completely by canceling the cycle you initially set for the dishwasher. Hold the StartReset button for about 5 seconds or until the Active indicator turns off. Shut the door of the dishwasher to allow it to thoroughly drain before turning it off. When the dishwasher completes draining, it beeps to indicate that it is done. Close the

door of these models and wait until the clock reads 001 before pressing the OnOff button. If the Child Lock Feature is engaged, an LED beneath the words Child Lock on the control panel is lit. When the child lock is engaged, you cannot work any of the other buttons on the unit. She has written for newspapers, magazines, online publications and sites. Brenner graduated from San Diegos Coleman College. Show Comments. It could be something simple, especially if you just installed it. Make sure the power cord is connected properly and a circuit breaker did not trip.

After that, if its water line was not flushed before installation, it might have air bubbles inside that keeps the water from flowing through the hose with the right amount of pressure. Disconnect the water supply line from the dishwasher and flush 2 gallons of water through it before reinstalling the hose. If that fails, troubleshoot your Bosch dishwasher filling problem by process of elimination. Cycle Interruption A Bosch dishwasher does not fill with water if the previous cycle was interrupted. If it was turned off for any reason and mistakenly left off, the dishwasher cannot fill with water, even though the unit comes on. Look for a kink in the water supply line. If you find one, shut off the water valve, and remove the hose and kinks. Reattach the water supply hose and turn on the valve. Hose Filter Most Bosch dishwashers contain a small filter inside the hose end to prevent sediment from your water supply getting inside the dishwasher. With the water supply hose disconnected, remove the filter from inside the hose, clean it thoroughly to remove any iron buildup or sediment, and replace. Reinstall the hose line and reopen the water supply valve. Water Pressure Verify you have enough water pressure to run the dishwasher. Grab a 1 gallon container and turn the faucet on to fill it. If you have enough water pressure to run the dishwasher, the container should fill up within 30 seconds. If it takes longer to fill a gallon container, you might not have enough pressure in your water delivery system to effectively use the dishwasher. Pooling Water The dishwasher does not fill for a new cycle when it has not drained from the last. If you open your dishwasher to find a pool of water inside, locate the largeobject trap in the center bottom of the dishwasher. Remove the bottom tray to access the largeobject trap. Turn the top of the largeobject trap counterclockwise onequarter turn and lift it out. Thoroughly clean its mesh filter.

Remove any large objects such as toothpicks, bones, broken glass or food debris from the filter area. Clean the large mesh screen that surrounds the largeobject trap before reinstalling everything in reverse of removal. Close the door to see if the dishwasher drains. If it does, you are free to start the next cycle. Water Inlet Valve Inside the bottom front of the dishwasher behind the kick panel, there is a water inlet valve that operates via electricity. Remove the Bosch power cord from the outlet or shut off power to the unit at the circuit breaker. Remove the kick panel by unscrewing the two screws on either side. Detach the screws that hold the front door panel in place from inside the dishwasher; pull the door panel down and set it aside. Close the door to access the water inlet valve. The water inlet valve has two wires that connect it to the circuitry of the unit. Check to ensure they are firmly attached. Also examine the valve for damage or leaks. If it is damaged, buy the part using the right model number for your dishwasher and replace it; otherwise, contact an appliance repair technician to do it for you. References Bosch Home Appliances FAQs Dishwasher Is Not Filling With Water Sears Parts Direct Bosch Dishwasher Manuals and Guides About the Author As a native Californian, artist, journalist and published author, Laurie Brenner began writing professionally in 1975. She has written for newspapers, magazines, online publications and sites. If your Dishwashers is not in this list please use the search box in top of the website, it could be that your Dishwashers is categorized in another category. Please refer to product details and specifications when making a final selection for purchase. Really clean. Bosch dishwashers are engineered to perform at the highest levels, to spotlessly remove even the toughest soiling. Think bakedon spinach.

At the same time, smart technologies ensure that Bosch power is directed in a way that smartly manages energy and water consumption, and protects delicate items, preserving their brilliant shine wash after wash, year after year. Available at AJ Madison. Bosch dishwashers are also the quietest.

When in action, its the noise factor, or rather the lack of it, thatll draw your attention. Their dishwashers are the strong, silent type. They outperform your expectations and the competition constantly earning top rankings from leading consumer publications and test labs worldwide. With a suspended twopump motor system, vibrations and noise are drastically reduced. And with heavyduty bitumen, coated metal and cottonfiber sheets insulation, the noise is basically buried. Boschs dishwashers are as discreet as they are powerful. Everything has been thought of with Bosch dishwashers. Like having an adjustable top rack, which allows you to safely put in tall stemware without having to lay them flat. With their TALLTUB, theyve created more interior room, maximizing use of space, so you can place dinner plates in both top and bottom racks. And should you want to make your dishwasher invisible, you can customize it. Integrated controls on the upper door rim allow you to seamlessly blend your dishwasher with your cabinetry, giving you an uninterrupted kitchen design. Actual delivery times will vary based on your location. If you are ordering multiple items and not all items qualify for Quick Ship, the order will ship when all items are available to ship. Quick Ship may not apply to multiple quantities of the same product. By using our site, you agree to our use of cookies. Visit our Privacy Policy to learn more. Complete documentation is available for your Bosch appliance. If you already know your Model Number, just enter the first few characters. The photo should be clear and welllit. Please double check your model number and make sure that all letters are capitalized.

Please try again or type the Model Number ENr into the field manually. Please contact us if you can't find what you're looking for. We would like to invite you to take part in a short one minute survey. Thank you. If you wish to be contacted by us, please use our regular contact form here, contact Customer Support at 800 9442904, or chat online with a Customer Support representative. Avoid this costly Customer Instruction service call by getting familiar with these dishwashers' Reset Feature. For many brands and models, the paused wash cycle will automatically start back up where it left off once the door is latched closed. Sometimes machines get old and must be replaced with new ones, other times you move into a new home supplied with Bosch appliances. Some new Bosch owners discover, rather costly so, that many Bosch dishwashers' models do not automatically start back up or unpause when the door is shut. I turned the machine off and on, but that didn't fix it. I think the pump is broken." Before going for a replacement pump or motor, find out if a wash cycle was simply interrupted or paused. Wait five seconds for the dishwasher to respond. If the control panel is upward facing, concealing the unit controls beneath the countertop when the door is closed often referred to as Incognito Design, try opening the door, press firmly then release the start button and return the door to the closed position, ensuring the door latches firmly. Wait for five seconds; if you hear motor movement the unit was likely in a paused cycle state. Wait for the dishwasher to complete the selected wash cycle and indicate through noise or control panel lighting that the wash cycle has completed. If you want to start a fresh, clean, cycle from the beginning without waiting for the selected wash cycle to complete, perform a reset of the dishwasher. Depending on your make and model, the reset feature will be marked with an asterisk and the word reset located below the applicable button.

On many modern Bosch dishwashers, the Reset button is the Start button, this can confuse some customers. To reset the modern Bosch dishwasher, press and hold the start button for about 3 to 5 seconds. On some older Bosch models, the reset feature may be called "cancel" or "drain". These older models require a specific Button Press Sequence or what we in the biz call a Key Dance to complete. Once drainage is complete the dishwasher control panel will indicate a Complete or Done cycle and then automatically enter its standby mode. Totally removing power from an appliance is what we in the Appliance Technician Industry refer to as a Hard Reset. Hard resetting a household electronic appliance should always be done from the Household Circuit Breaker Box. Find the breaker box and switch the dishwasher circuit breaker to the off position. Now check out the hopefully labeled dishwasher circuit breaker. It should be labeled dishwasher or DW for short, and

it's usually a 15 to 20 Amp breaker. The dishwasher is now ready to begin a wash cycle from the beginning. You're welcome! If it didn't, and if you feel like you need professional help but you want to save some money, you can call on Neli. Our certified technicians can walk you through troubleshooting and solving your appliance problems through our advanced camera sharing software and chat. You can request any technician you like, including myself! You can always ask us anything if you pay a visit to NeliHome.com and start a chat. Whether it's a leaky refrigerator or your dryer that seems to take forever, DoItYourself doesn't mean you have to do it alone. Neli's got your back! I think grandbaby may have pressed buttons and locked it up. Can you help Just started chat on the lower right of these webpages and one of our agents will take care of you. You can also set up your own appointment to talk to one of our technicians. You can do that by going here. The wife started the dishwasher and it just sat there.

In the morning I turned the water supply on and it still will not run. I pressed and held the start button unit is less than a year old and a code 01 popped up. But it will not run. I have not yet done a hard reset would you suggest that or should I call for service Thanks Do We'd then be happy to help you with more troubleshooting if you'd like to set up an appointment here. Just make sure you understand our service works before booking an appointment I didn't leave breaker off for 7 mins tho only 4 or so should ai do that Sorry it took so long to answer your comment. You can chat with us on nelihome.com, make and appointment or call 8338760900. We will work with you during your appointment. Talk soon! Team Neli The cycle Auto LED illuminates. If I want to change a cycle type or add a function e.g. half loaf, which is the function i use a lot, Selecting any new cycle or adding any function does not work. What happens is I select the new function, the corresponding LED illuminates, I hear a chirp BUT the new cycle or function setting DOES NOT stay illuminated. As I had time today to investigate this, I called Bosxh Customer Care. When speaking and describing in detail the sequence of steps, and behavior of resulting steps, she guided me to do a "soft reset" of the dishwasher. Suggestions If you are still having an issue with your arrow button, you can chat with us or make and appointment. You can also call 8338760900. nelihome.com. Talk soon, Team Neli We will solve your Bosch issue and get your dishwasher working again. See you soon, the Neli Team 8338760900 It's not so much an issue for my wife and I who have become familiar with it, although still a nuisance. But when we have visitors who inevitably disrupt the wash to add a dish because they didn't know it was running, it becomes a real problem. We most often have visitors around the holidays and there's nothing like waking up Thanksgiving or Christmas morning to find the dishwasher didn't finish.
