Find Function 4 Go To Rung Comment 20. Find Function 5 Find Bit Addresses 21. Memory capacity recommended by Microsoft. Hard disk Approx. 3.4 GB or more available space is required to install the complete CXOne package. Display XGA 1024 x 768, High Color 16 bit or better Disk drive CDROM drive or DVDROM drive Communication ports RS232 C port, USB port, or Ethernet port see note 3. Other Internet access is required for online user registration, including a modem or other hardware connection method. Note 1 CXOne Operating System Precaution 1 System requirements and hard disk space may vary with the system environment. 2 Except for Windows XP 64 bit version. 2 The amount of memory required varies with the Support Software used in CX One for the following Support Software. Refer to user documentation for individual Support Software for details. CXProgrammer, CXDesigner, CXThermo, CXSimulator, CXProtocol, CXMotion, CXDrive, CXProcess Tool, and Faceplate AutoBuilder for NS 3 Refer to the hardware manual for your PLC for hardware connection methods and cables to connect the computer and PLC. For details on procedures for installing the CX Programmer from the CXOne, refer to the CXOne Setup Manual W463E1 provided with CXOne. For details on procedures for installing the CX Programmer from the CXOne, refer to the CXOne Setup Manual W463E1 provided with CXOne. Click the left mouse button on and select a CPU type. Installation to Startup Installation to Startup Opening a new project Opening a new project Device type settings Device type settings Creating a program Creating a program 13 Title Bar Menus Project Tree Section Project Workspace Ladder Window Output Window Toolbars Status Bar Symbol Bar. Enables you to divide one program into a given number of blocks. Each can be created and displayed. Status Bar Output Window A screen for creating and editing a ladder program. Ladder Window Controls programs and data. <http://alvit-bk.ru/userfiles/delonghi-model-trn0812t-manual.xml>

Enables you to copy data by the element by executing Drag and Drop between different projects or within a project. Project Workspace Project Tree Enable you to select functions by clicking icons. Dragging toolbars enables you to change the display positions by the group. Toolbars Enable you to select menu items. Menus Shows the file name of saved data created in CXProgrammer. Information Window Displays the name, address or value, and comment of the symbol presently selected by the cursor. Symbol Bar Information Window 14 When SYSWIN key allocation is

selected, a key operation guide will be displayed at the bottom of the display. Display in Full View Right mouseclick Display in Normal View When Alt is pressed When Shift is pressed When Ctrl is pressed 41. Compatible SYSWIN Key Allocation After the above operations, the key allocations will be changed and become compatible with SYSWIN. Click the icon shown in the task bar on the right bottom of the display. Function keys will be available for entering ladder programs. Click Giving names indicating the contents of processing or controls is possible. There is no limit on the number of sections per program. Changing a section name Click the right button of the mouse on the section whose name is to be changed. Example Enter a given name. 16 Doubleclick a section that you want to check its ladder. As checking the global image control flow of a program on the section list, you can go to a specified section. 17 ENT Switch 1 Enter a symbol comment. Deletion of instructions Move the cursor to the instruction and then press the DEL key. Move the cursor to the right cell of the instruction and press the BS key. Useful Function Automatic check of duplicated coils If a duplicated coil is entered during program creation, the following message is displayed and you can notice that the coil is duplicated right away. The place of a duplicated coil in the program is displayed.

Doubleclick by using a mouse or press F4. The cursor moves to the place of the applicable coil on Ladder Window. Doubleclick Doubleclick Rungs are also normalized when you move the cursor position to the cell inverted in blue by pressing the arrow keys from a keyboard or using a mouse. Installation to Startup Installation to Startup Opening a new project Opening a new project Device type settings Device type settings Creating a program Creating a program 111 Click the check box to remove the check mark. Click Installation to Startup Installation to Startup Opening a new project Opening a new project Device type settings Device type settings Creating a program Creating a program 112 Doubleclick the left mouse button on a bit number that you want to enter a symbol comment, and you will be able to enter a symbol comment. The comments of the selected two bits are copied. Move the cursor to the contact to which you want to write an annotation.
